EXPERIENCE

Appian Corporation, McLean, VA

January 2023 – Present

Solution (Support/Systems) Engineer

- **Advanced Tooling:** Developed Grafana dashboards for tracking critical metrics of one of the team's core operations, reducing support time from 3 minutes to 20 seconds per operation
- **Systems Support:** Maintain over 1000 Linux production environments and improve the availability and reliability through proactive Prometheus alert management
- **Application Development:** Built 5 Appian applications using SAIL, including an AI Chatbot integration for the Technical Case Management Platform, handling 300 support case interactions per month
- **Mentorship:** Delivered training sessions to 10 associates on networking systems, storage, and Linux, and fostered skill development within the team
- **Cross-team Collaboration:** Collaborated with engineers in UK and Australia to design new product features, synthesizing customer needs and technical requirements
- **Cloud Infrastructure:** Authored over 50 pages of AWS and Appian integration guide featuring over 8 major services to empower Solution Engineering in resolving technical difficulties across platforms

Associate Solution Engineer

- **Customer Centricity:** Troubleshoot technical issues for customers using Cloud Platform, including networking, database access, and 3rd party cloud provider integration to support customers' critical business operations

KAANNAN & Associates, Carmel, IN

June 2022 – August 2022

Technology Analyst (Consultant) Intern

- **Solution Delivery:** Performed quantitative analysis on workforce productivity and delivered recommendations that enhanced client's operation performance by 15%
- **Project Management:** Supported 3 workstreams of a digital enterprise program of a \$39B business in healthcare industry and liaised with senior stakeholders to gather requirements

Kelley School of Business, Indiana University, Bloomington, IN

May 2022 – August 2022

Principles of Programming Teaching Assistant

- **Leadership Development:** Hosted lab sessions to debug and test 40 students' Python applications and scheduled weekly appointments to provide additional assistance
